

Oxxius achieves ISO 9001 certification

Lannion, January 29th, 2008 - Oxxius (www.oxxius.com) achieved ISO 9001:2000 certification for its activities in designing, manufacturing and selling lasers.

This recognition crowns the 14-months effort of 30-person project team working together towards a common objective: to improve the company's organization and ensure customer satisfaction.

The audit was conducted by AFAQ AFNOR, a French leader and one of the leading certification bodies worldwide in the field of quality management.

Obtaining this certification validates Oxxius' dedication to continuous improvement in all its operations and will contribute to the company's growth internationally.

About Oxxius:

Oxxius is focused on developing innovative solid-state laser solutions for industrial and scientific applications.

The Oxxius product line features compact laser modules with wavelengths in the visible and near-ultraviolet spectrum. Based on a patented miniaturized architecture, they combine outstanding optical performance with low-cost volume production.

Oxxius is headquartered in Lannion, France, a major cluster for R&D in optics, has a sales offices in California and distributors in all major industrial countries. The company is funded by VC firms Sofinnova Partners, AXA Private Equity (Paris, France) and Sofinnova Ventures (San Francisco).
