| <b>Product range</b> | Laser Diode Illuminators (LDI)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Product name</b>  | LDI-7 Laser Diode Illuminator                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Reference</b>     | LDI-7                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Description</b>   | <p>The LDI-7 laser diode illuminator is the most spectrally complete model in the MixxWave Gen1 range, covering 7 lines across the full visible spectrum — from 405 nm (DAPI) to 640 nm (Cy5) — including the 445, 520 and 528 nm lines unavailable on the LDI-4 and LDI-5. With up to 1000 mW per line and a 100:1 linear dynamic range, it provides the flexibility needed for complex multicolor fluorescence protocols in confocal, SIM, TIRF and PALM/STORM applications. Formerly part of the 89 North product line, the LDI-7 is now manufactured and supported by Oxxius.</p>  <p><b>Key features</b></p> <ul style="list-style-type: none"> <li>• 7 laser lines across the full visible spectrum (405 nm to 640 nm)</li> <li>• Up to 1000 mW output power per line</li> <li>• No user alignment required</li> <li>• TTL &amp; Analog control</li> </ul> <p>Discover the next-generation LDI-G2-7.</p> |

## Product Variations

| Part Number   | Combined wavelengths                    |
|---------------|-----------------------------------------|
| LDI-7         | 405 / 445 / 470 / 520 / 528 / 555 / 640 |
| LDI-7-577     | 405 / 445 / 470 / 520 / 528 / 577 / 640 |
| LDI-7-488     | 405 / 445 / 488 / 520 / 528 / 555 / 640 |
| LDI-7-488-577 | 405 / 445 / 488 / 520 / 528 / 577 / 640 |

## Performance by Wavelength

| Wavelength | Optical Power Min <sup>1</sup> | CW Stability (typ.) <sup>2</sup> | Max Rise Time (typ.) <sup>3</sup> | Max On/Off Frequency <sup>4</sup> |
|------------|--------------------------------|----------------------------------|-----------------------------------|-----------------------------------|
| 405        | 300 mW                         | 2 %                              | 10 µs                             | >1000 Hz                          |
| 445        | 1000 mW                        | 2 %                              | 10 µs                             | >1000 Hz                          |
| 470 or 488 | 1000 mW                        | 2 %                              | 10 µs                             | >1000 Hz                          |
| 520        | 500 mW                         | 2 %                              | 10 µs                             | >1000 Hz                          |
| 528        | 500 mW                         | 2 %                              | 10 µs                             | >1000 Hz                          |
| 555 or 577 | 1000 or 700 mW                 | 2 %                              | 2 ms                              | 100 Hz                            |
| 640        | 400 mW                         | 2 %                              | 10 µs                             | >1000 Hz                          |

### Legends

1. Optical Power Min: Measured at 100% intensity, 23 °C ±2 °C.
2. CW Stability (typ.): Standard Deviation relative to mean power, at 100% intensity, 23 °C ±2 °C.
3. Max Rise Time (typ.): Measured at 100% intensity, 23 °C ±2 °C.
4. Max On/Off Frequency: Measured at 100 % intensity, 50 % duty cycle
